

Extra-fine. Artists' Quality
Gama de 59 colores.
Tubos de 21 ml. Series de 1 à 5

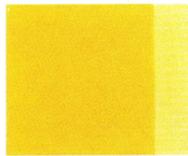

Colores triturados a la antigua. Se fabrica esta gama de colores con los pigmentos extrafinos Sennelier y gomas naturales de alta calidad. La consistencia untuosa de estos colores permite realizar colores planos regulares. Estos guaches extrafinos tienen un poder cubriente excepcional y dan una pincelada de aterciopelado mate profundo y opaco. Estos colores se pueden mezclar entre ellos y son muy estables a la luz (excepto algunos tonos apuntados pero necesarios para trabajos de ilustración).

Les couleurs du nuancier se rapprochent le plus possible des couleurs réelles mais sont limitées par les techniques d'impression.
Ce nuancier ne doit être utilisé qu'à titre indicatif.

GOUACHE
extra-fine
SENNELIER

Los guaches Sennelier se pueden aplicar con pinceles, aerógrafos y plumas, sobre la mayoría de los tipos de papel espeso y de cartón. Solubles en el agua, se pueden mezclar con las acuarelas y las tintas para obtener otras combinaciones de opacidad y de transparencia.

SENNELIER
